BAND STORY

"

Been around the music scene for a long time...done things that were kool in my time..Love the "challenge" of playing the instruments "live" right here...right now..love writing-recording-and mixing. I learn more by "listening" and i am always game to listening to muso's. My recording styles are of that of "not following the followed" I like blowing things up...and trying outrageous things to be "different".
